the topic feminist research has too often been neglected in standard research methods books  
the handbook of feminist research represents the establishment of a new tradition or paradigm  
in viewing how the research process is implemented  
feminist researchers bring unique epistemological and methodological perspectives to the research process  
feminists approach to methodology allows for new types of questions about women's lives and those of other marginalized groups to be addressed within their respective fields of research  
this handbook stresses the interconnections between epistemology methodology and methods they are not

de linked from each other but work together in dynamic ways to produce new knowledge and this openness itself is also characteristic of how feminist researchers approach their work feminists engage synergistically with all three aspects of the research process epistemology methodology and method through a synergistic connection between these elements of research epistemology methodology and method we find that feminist research often shapes new research endeavors that are greater than the sum of their parts in other words while traditional research employs these components of research the synergistic engagement of these components in feminist research questions the status quo aiming to raise our consciousness about how we do research looking at the selections provided in this handbook we are able to look at feminist research its implementation of synergistic use of epistemology methodology and method and the resulting qualities of feminist research in practice

the role of the knowledge activist is to be unreasonable to identify and combine those small grains of truth that have the potential to become pearls this work demonstrates through the medium of storytelling how individuals can combine emotion and reflection to create their own knowledge the knowledge activist s handbook is provocative and counter cultural it turns ideas on their heads and entertains while telling stories that offer insights and concrete strategies for improving knowledge and its use in any organization
